Who We Are & What We Do

*Better Learning from Better Learning Technology™*

- **Effective collaboration** of global leaders means getting to the future sooner with sustainable results

- **Seamless plug & play** creates better user experiences; enables educational insight across products; reduces complexity & cost

- **Agile open architecture & extensive ecosystem** enables experimentation, flexibility & efficiency in a time of rapid change

*How Much Better? 10-1000x Better*
Today’s Guest Speakers

Pete Just,
Metropolitan School District of Wayne Township (IN)
Thank You To Our Guests!

K-12 Playbook:
Resources to Help Districts Transition to a Fully Integrated Digital Ecosystem

The K-12 Playbook is an easy-to-use reference and resource center for K-12 administration, digital curriculum teams, and IT leaders who are working towards a fully integrated digital ecosystem to enable student-centered learning. Created by IMS Global K-12 members, these resources are designed to help districts of all sizes shorten the learning curve around the adoption of IMS Interoperability standards to create a plug and play integrated teaching and learning ecosystem.

K-12 Webinar Series
In partnership with CoSN and the Learning Counsel, IMS Global is proud to host an ongoing webinar series to share how districts are evolving towards student-centered learning based on open, plug-and-play technologies and integrated curriculum architecture.

Getting Started
Case studies, articles, videos and much more to help districts of all sizes begin to transition to a fully integrated digital teaching and learning ecosystem.

Leadership & Collaboration
Collaboration among IMS Global members is the catalyst to accelerating adoption of a plug and play digital learning ecosystem. Learn more about how districts are leading the revolution and how to join the collaboration to help create the future of education.

Procurement Resources
Ensuring that your educational technology tools are IMS Certified is the best way to establish a plug and play ecosystem. IMS Global has developed RFP language and checklists that districts can use when procuring digital platforms, apps and tools.

How Does IMS Enable Better Digital Learning Experiences?

Seamless plug & play integration
Creates better user experiences & enables greater educational insight.

Agile open architecture & extensive ecosystem
Enables flexibility, efficiency & choice.

Effective member-based collaboration
Means getting to the future sooner with sustainable progress.

OneRoster® Checklist and RFP Language

**Background**

As schools and districts drive online learning resources, two significant barriers are preventing the effective use of digital curricula.

**The Barriers:**

1. **User Experience**
   - Currently teachers and students must interact with many different digital platforms to access learning resources. This often results in a confusing and inconsistent experience for students.

2. **Security**
   - It is standard practice for a district to retain control of its LMS. This presents a challenge for developers to ensure that the LTI® environment is secure and compliant with local regulations.

**The Solution:**

IMS Global Learning Consortium developed Scoring Tools Interoperability® (LTI®) to handle the high-dimensional problem of securely integrating learning applications. The goal is to enable a broad range of applications to be securely connected and data to be shared between them.

**Additional Resources:**
